遊戲規則：於黃格內發問問題，然後（闊號）發問者的名字
答案放於發問者格子之中，然後轉成白色文字以掩蓋答案

答問題者可以於第二天發問新問題之前回答問題，然後自行檢查答案 (select the text inside the box and you can see the answer, no need to change colour of the text)，再把自己的答案轉成白色文字以掩蓋自己的答案

該問題的答案會於第二天轉成紅色文字，其他人答案則會轉成黑色文字
發問者亦可以於黃格的問題之下提供題解（例如ppt slide. anatomy photos, written explanation etc)

Kelly 每日做完題目 要send一個心靈雞湯 好似上年咁!!!!!!!!!!!!

Question	Alvin	Avis	Martin	Kelly	Vinci
17/4					
1. What is the most common way of metastasis in HCC? (Kelly)	Venous invasion	Venous invasion	venous	Venous invasion	Venous invasion

2. Name 5 structures that pass through foramen ovale. (Martin)	1. Mandibular nerve	Otic ganglion CN V3 Lesser petrosal nerve Emissary vein	O = otic ganglion V = Mandibular nerve (V3) A = Accessory Meningeal Artery L = Lesser petrosal nerve E= Emissary vein AS =	Otic ganglion V3 (Mandibular nerve) Accessory meningeal artery Lesser petrosal nerve Emissary veins	Otic ganglion V3 Accessory meningeal artery Lessor petrosal nerve Emissary veins
3. Name the cubital fossa boundaries (lateral medial superior roof and floor) (Alvin) MSS11 P.8	Lateral: Brachioradialis Medial: Pronator teres (Lateral side) Superior: Line between the two epicondyles of humerus Roof: Skin, fascia, bicipital aponeurosis Floor: Supinator, brachialis	Not revise yet	Lateral: medial epicondyle Medial: medial epicondyle Superior roof Floor:	Lateral: Medial sides of Pronator teres, brachioradialis Medial: Short head of biceps brachii Superior: Line between the two epicondyles of humerus Roof: Skin and fascia Floor: ?? Pronator teres??	Border along the medial epicondyle Bracioradialis Pronator teres
4 . Which muscles converge to form the		Not revise yet			Gastrocnemius &soleus

tendo calcaneus (achilles tendon)? (vinci)					
18/4					
1. What is the tumour marker for a) HCC and b) prostate cancer respectively? (Kelly)		Alpha feto-protein Prostate specific antigen	I dont know. Prostate cancer is from which block?	a) Alpha-feto protein (AFP) b) Prostate specific antigen (P	(a) Alpha-fetoprotein (b) PSA
2. Two Adverse effects of SSRI (Do not type nausea or GI upset) (Avis)		Diminished sexual function and interest Reduced coagulation Increased risk of bleeding Favors Vasoconstriction	Increase bleeding risk (blood coagulation decreases) Vasoconstriction	i forgot haha	idk

3. (Let's revise some fundamental things first la) Name the unique histological function of a) duodenum and b) ileum. Hence, state the histological layers of the structures (Martin)		Brunner gland Peyer patch submucosa	Duodenum: Bunner's gland (submucosal) Ileum: Peyer patch (mucosa)	a) Brunner's glands b) Peyer patches Submucos	(a) Bunner's glands (b) Payer's patches Mucosa (?)
What are the treatments for HBV? (vinci)		Entecavir tenofovir		NRTI NNRTI N3A 4A 5A 5B inhibitors	Nucleoside analogs (eg. entecavir/ tenofovir) Pegylated interferon
19/4					
1. Two foods avoid when taking Monoamine Oxidase (Avis)					

2. What is the motor innervation to the cricothyroid muscle? (Kelly)					
3. State a clinical feature other than abdominal plan, malaise, and anorexia of ulcerative colitis. (Martin)
